

reliableIT Business Intelligence (BI) Training

reliableIT training is established to provide advanced-level career and technical education program based on rigorous academic and industry standards, preparing students for post-secondary education and successful entry in high-skill, high-demand Business Intelligence career.

Business Intelligence Analyst (BIA)

The Business Intelligence (BI) Analyst training is designed to prepare students for entry-level Business Intelligence position in a variety of industries. Students gain skills using BI tools to analyze on data in BI environment, and serve as a team member on Business Intelligence and Data Warehousing projects.

Learning outcomes

Certificate recipients should possess the skills and abilities described below:

- Develop a dimensional model for a business process
- Implement a simple dimensional model by creating a data mart or a data warehouse that satisfies accepted practices.
- Create a multidimensional database using a data mart and/or a data warehouse as a data source.
- Create and manipulate On-Line Analytical Processing (OLAP) objects that satisfy stated requirements.

	Description	Price	Status
	BI Analyst (BIA)	\$ 1450 Per Course	Fall13
BIA 105 A/B - SQL Fundamentals I & II		\$ 2900.00	
BIA 110 A/B - Dimensional Analysis I & II		\$ 2900.00	
BIA 115 A - Data Warehouse Concepts Intro to the fields*		\$ 1450.00	
BIA 115 B - Data Warehouse Implementation using Oracle		\$ 1450.00	
BIA 200-BI Research Project/ field trip to TDWI conference		*	
BIA program includes: Laptop and BI Software for training and IT services for one year.		(over \$10,000 value)	

Business Intelligence ETL Developer

The Business Intelligence (BI) Developer training is designed to prepare students for entry and mid-level Business Intelligence (BI) Systems. Students use state – of the –art Oracle tools to design and create BI Solutions. They design and develop database reports, data warehouses and multi-dimensional databases.

Learning outcomes

Certificate recipients should possess the skills and abilities described below:

- Develop a dimensional model for a business process
- Implement a complex dimensional model by creating a data mart or a data warehouse that satisfies accepted practices.
- Create a multidimensional database using a data mart and/or a data warehouse as a data source.
- Create and manipulate On-Line Analytical Processing (OLAP) objects that satisfy stated requirements.
- Create complex reports using data from a multi-dimensional database that satisfy stated requirement
- Design, create and apply multi-dimensional queries against an OLAP Cube
- Design and Create Dashboard tool based on a business scenario.

	Description	Price	Status
	BI ETL Developer (BID)	\$ 1450 Per Course	Fall13
BID 105 - Data Analysis and Design		\$ 1450.00	
BID 107 A/B - SQL Fundamentals I & II		\$ 1450.00	
BID 110 A/B - Dimensional Modeling		\$ 1450.00	
BID 115 A - Data Warehouse Concepts Intro to the fields*		\$ 1450.00	
BID 115 B - Data Warehouse Implementation using Oracle		\$ 1450.00	
BID 200 A - Data Visualization using Oracle JDeveloper11g		\$ 1450.00	
BID 200 B - Data Visualization using DOMO Dashboard		\$ 1450.00	
BID program includes: Laptop and BI Software for training and IT services for one year.		(over \$10,000 value)	

Dashboard Developer

The Business Intelligence (BI) Dashboard Developer training is designed to prepare students for entry and mid-level Business Intelligence (BI) Systems and Performance Management (PM) technologies. Students use state-of-the-art Oracle tools and DOMO tools to design and create Dashboard Solutions. They design and develop database reports, data warehouses and Web-based Business Intelligence Dashboard tools.

Learning outcomes

Certificate recipients should possess the skills and abilities described below:

- Develop a dimensional model for a business process
- Implement a simple to complex dimensional model by creating a data mart or a data warehouse that satisfies accepted practices.
- Create a multidimensional database using a data mart and/or a data warehouse as a data source.
- Create and manipulate On-Line Analytical Processing (OLAP) objects that satisfy stated requirements.
- Create simple to complex Dashboard reports using data from a multi-dimensional database that satisfy stated requirement
- Design, create and apply multi-dimensional queries against an OLAP Cube
- Design and Create Dashboard tool based on a business scenario.

	Description	Price	Status
	BI Dashboard Developer (BIDD)	\$ 1450 Per Course	Winter 14
BIDD 105 - Dashboard Analysis and Design		\$ 1450.00	
BIDD 107 A/B – SQL Fundamentals I & II		\$ 1450.00	
BIDD 110 A - Dimensional Modeling		\$ 1450.00	
BIDD 115 A - Data Warehouse Concepts Intro to the fields*		\$ 1450.00	
BIDD 200 A – Data Visualization using Oracle JDeveloper		\$ 1450.00	
BIDD 200 B – Data Visualization using DOMO Dashboard		\$ 1450.00	
BIDD program includes: Laptop and BI Software for training and IT services for one year.		(over \$10,000 value)	

Cloud BI Developer

The Cloud Business Intelligence (BI) Developer training is designed to prepare students for entry and mid-level Business Intelligence (BI) Systems, Cloud technologies and Cloud computing. Students use state-of-the-art Oracle tools, Google tools, and DOMO tools to design and create Cloud BI Solutions. They design and develop database reports, data warehouses and Web Business Intelligence tools.

Learning outcomes

Certificate recipients should possess the skills and abilities described below:

- Develop a dimensional model for a business process
- Implement a simple to complex dimensional model by creating a data mart or a data warehouse that satisfies accepted practices.
- Create a multidimensional database using a data mart and/or a data warehouse as a data source.
- Create and manipulate On-Line Analytical Processing (OLAP) objects that satisfy stated requirements.
- Create simple to complex Dashboard reports using data from a multi-dimensional database that satisfy stated requirement
- Design, create and apply multi-dimensional queries against an OLAP Cube
- Design and Create Dashboard tool based on a business scenario.

	Description	Price	Status
	Cloud BI Developer (CBID)	\$ 1450 Per Course	Winter 14
CBID 105 - Dashboard Analysis and Design		\$ 1450.00	
CBID 107 A/B – SQL Fundamentals I & II		\$ 1450.00	
CBID 110 A - Dimensional Modeling		\$ 1450.00	
CBID 115 A - Cloud Concepts Intro to the fields*		\$ 1450.00	
CBID 200 A – Implementation an Oracle Cloud Solution		\$ 1450.00	
CBID 200 B – Implementation a Cloud Solution		\$ 1450.00	
CBID program includes: Laptop and BI Software for training and IT services for one year.		(over \$10,000 value)
